

REGIONAL PARTNERSHIP GRANTS PROGRAM

The RPG program focuses on building system-level capacity and enhancing safety, permanency, and well-being outcomes for children and their families who are affected by substance use disorders. The awards support interagency collaboration and the integration of programs, services, and activities. Historically, child welfare services and substance use disorder treatment have been fragmented, making it difficult for families to navigate the dependency court process and meet the requirements of both systems. The RPG program provides an opportunity to resolve these challenges through partnerships, coordinated care, and collaboration. This funding opportunity addresses the need to align efforts more closely between child welfare and substance use disorder treatment agencies in supporting families as they navigate multiple system. It also seeks to expand the evidence base of programs and practices in the fields of child welfare and substance use disorder treatment by requiring recipients to:

- ▶ Identify and use appropriate practices that are indicated by evidence to be well-supported, supported, promising, or emerging practices
- ▶ Adapt these practices for the children, parents, and families they serve, where appropriate
- ▶ Incorporate local and cross-site evaluation into the program to expand the evidence base on services for families involved in the child welfare and substance use disorder treatment systems

RPG PROJECTS 2007-2023

**FROM 2007 TO 2023
THE RPG PROGRAM
HAS SERVED:¹**

**53,270
CHILDREN**

**42,411
ADULTS**

**36,042
FAMILIES**

The Child and Family Services Improvement Act of 2006 reauthorized the Preserving Safe and Stable Families (PSSF) program. This legislation provided funding to implement a targeted grant program to regional partnerships to improve permanency outcomes for children affected by methamphetamine and/or substance abuse. This legislation was in direct response to the recognition that parental substance use is a key factor underlying the abuse or neglect experienced by many children in the child welfare system. Since the Children’s Bureau awarded the initial 53 grantees in 2007 and following the 2011 reauthorization of the Child and Family Services Improvement and Innovation Act, four more rounds of grants were funded. In 2018, the Bipartisan Budget Act of 2018 reauthorized the RPG program through 2021. An additional eight new awards were made in October 2019 and 18 new awards in 2022, for a total of 127 funded projects in 40 states. The 2018 reauthorization of the RPG program now requires a planning phase prior to recipients’ implementation of their projects and includes a change in mandatory partners.

REGIONAL PARTNERSHIP GRANTS PROGRAM OVER TIME

**127
TOTAL PROJECTS**

**7
ROUNDS**

**40
STATES**

**613
COUNTIES**

**11
PROJECTS**

have served or are serving primarily American Indian/Alaska Native families

EMERGING FINDINGS:²

Child safety as measured by substantiated maltreatment, abuse, and neglect, significantly improved following RPG involvement.

Fewer removals from the home occurred, and there was increased permanency and reunification among children who experienced removal.

Child well-being across two measures improved: reduced behavior problems and improved socialization. Executive functioning remained stable.

There was an increase in substance use disorder treatment enrollment and completion, and a decrease in high severity substance use, following RPG program entry.

**UPON EXIT, OPIOID USE DECREASED FROM 16% TO 4%
FOR PRESCRIPTION OPIOIDS AND FROM 4% TO 2% FOR HEROIN²**

² SOURCE: Emerging Findings from the 2012-2017 National Cross-Site Evaluation of the Regional Partnership Grant (RPG) Program

FAMILY-CENTERED SUBSTANCE USE DISORDER TREATMENT

Recipients focus on providing comprehensive family-centered treatment that recognizes the biopsychosocial nature of substance use disorders as they affect the entire family. They implement strategies to make it easier to identify and engage parents in the child welfare system with substance use disorders. Strategies integrate parent-child evidence-based interventions with substance use disorder treatment that are culturally appropriate and maximize the family's strengths.

TRAUMA-FOCUSED SERVICES

Recipients recognize that individuals with substance use disorders and their children often have histories of trauma and respond by providing evidence-based trauma services to meet the needs of participants that improve overall treatment outcomes. Examples include: Trauma-Focused Cognitive Behavior Therapy, Seeking Safety, Helping Women Recover.

STRENGTHENING COLLABORATIVE CAPACITY TO MEET THE NEEDS OF ALL FAMILIES WITH EQUITY

Recipients establish committed and coordinated collaborative practices across systems and organizations to eliminate disproportionate access and disparate outcomes. RPGs show that by investing time, resources, and effort into broad-based interagency partnerships, integrated services can be developed that result in positive child, parent, and family outcomes.

PARENTING AND FAMILY STRENGTHENING PROGRAMS

Recipients implement evidence-based interventions to help families improve parenting skills and increase child skills. Examples include: Nurturing Fathers Program; Nurturing Parenting Program; Celebrating Families!; Parent-Child Interaction Therapy; Attachment, Regulation, and Competency Model.

MEDICATION-ASSISTED TREATMENT

Recipients respond to the growing opioid crisis by integrating medication-assisted treatment, counseling, and other therapies into their service delivery. They create a coordinated, multisystemic approach grounded in early identification and interventions that ensure families gain access to the range of services they need.

FAMILY TREATMENT COURT

Family treatment courts (FTCs) serve as lead agencies for some projects, and in other cases serve as part of the partnership. The FTCs bring together child welfare, substance use disorder treatment, the courts, and community service providers to meet the diverse needs of the families they serve.

TRAINING AND STAFF DEVELOPMENT

Recipients provide cross-training to a broad range of professionals, including partners and community providers on evidence-based and evidence-informed interventions and practices. They also identify gaps in training for their regions and work with community partners to fill the training gaps.

IN-HOME PARENTING AND CHILD SAFETY SUPPORT FOR FAMILIES

Recipients deliver services to meet the diverse needs of parents whose children have been removed or are at risk of removal by partnering with service providers in their communities to provide in-home parenting and support to families. Examples include: Child-Parent Psychotherapy, Promoting First Relationships, Healthy Families America.

SERVICES TO PREGNANT AND POSTPARTUM WOMEN AND THEIR FAMILIES

Recipients meet the specific needs of pregnant and postpartum women with substance use disorders and their family members by creating a collaborative approach between medical providers, child welfare, substance use treatment providers, and early childhood services providers to coordinate services and meet the needs of the mother, infant, and family. Examples include: Plans of Safe Care, Attachment and Bio Behavioral Catch Up, Pregnancy and Parenting Partners program.

PEER AND RECOVERY SUPPORT

Several recipients integrate trained peer and recovery specialists into their service delivery models. Peers may have prior child welfare involvement and may be in recovery themselves. Recovery specialists enhance support by providing subject matter expertise in substance use disorders and child welfare. Some peers provide expertise and feedback in the development of practice and policy processes.

RPG recipients provide services and supports to children, parents, and families through interagency collaboration and community partnerships. Successful recipients have established collaborative infrastructures capable of building on the region's capacity to meet a broad range of needs of families involved with child welfare, substance use disorder treatment, dependency courts, mental health, children's services, housing, primary health care, education, early childhood, local evaluation, in-home services, universities, and resource centers. Together, these partners work to coordinate and integrate their efforts to produce improved outcomes for children, parents, and families.

INCLUDING PERSONS WITH LIVED EXPERIENCE: Engaging persons with lived experience of SUD recovery and child welfare involvement at every point during planning, implementation, and operations is essential. Active involvement in policy setting and service delivery can strengthen program development and operations.

ENGAGING DIVERSE PARTNERS: Collaborative teams are stronger and able to better meet the needs of children, parents, and family members when they include a range of diverse partners. Having a collaborative team that is representative of the community and families being served assures all perspectives are heard.

DATA-DRIVEN DECISION-MAKING AND DATA SHARING: Using cross-system data to drive practice improvements by identifying: 1) barriers to recruitment and retention, 2) disproportionate access to treatment and disparate outcomes, 3) effectiveness of evidence-based and evidence-informed practices is crucial to successful collaboration and program implementation.

RPG PROGRAMMATIC TECHNICAL ASSISTANCE:

RPG projects receive technical assistance to assure robust implementation and operation of their projects. The Center for Children and Family Futures was awarded the National Center on Substance Abuse and Child Welfare (NCSACW) contract to provide this assistance. The NCSACW, is an initiative co-funded by the Children's Bureau in the Administration on Children, Youth and Families, and the Substance Abuse and Mental Health Services Administration's Center for Substance Abuse Treatment. Technical assistance to recipients focuses on collaborative practice and policy; trauma-informed services; evidence-based and evidence-informed services, treatment and recovery support services; family-centered intervention and support; and program sustainability.

RPG NATIONAL CROSS-SITE EVALUATION AND EVALUATION-RELATED TECHNICAL ASSISTANCE:

RPG projects participate in evaluation activities at the local and national cross-site level. Mathematica was awarded the contract to provide evaluation-focused technical assistance and conduct a national cross-site evaluation of current projects. For this project, Mathematica (1) reviews proposed RPG programs, partnerships, and local evaluations; (2) provides evaluation technical assistance to strengthen recipients' local evaluations and support their participation in the national cross-site evaluation; (3) collects performance measures from recipients and develops a report to Congress on their progress; and (4) conducts a cross-site evaluation of the implementation, outcomes, and effectiveness of RPG programs.
